Figure 7

Fig. 1 is a schematic diagram of a device 14. The device has an irregular, elongated outer boundary. Inside the device, there is a hexagonal component 44. On the left side of the hexagonal component, there are two sets of parallel lines. The upper set is labeled 26 or 38, and the lower set is labeled 50 or 52. These lines appear to be part of a larger structure or a connection point.

Figure 1 is a schematic diagram of a person wearing a head-mounted display (HMD) system. The HMD includes a main body (14) and a side component (48). A rectangular display unit (44) is attached to the side component. A cable (26, 38, 50 or 52) connects the main body to the display unit. The person's head and torso are shown in outline.
